

TEST CASES FOR FMI E-PORTAL

Scenario: Login with valid username and password

Given I open the FMI e-portal website: <https://e-portal.uni-plovdiv.bg/account/login/>

And I see the login form

When I enter my username and password

And I click on the button "Вход"

Then the university G-Suite is displayed (G-Suite is the Google package of services which the university uses)

And the dashboard menu is visible

Scenario: Login with invalid username and password

Given I open the FMI e-portal website: <https://e-portal.uni-plovdiv.bg/account/login/>

And I see the login form

When I enter random username and password

And I click on the button "Вход"

Then a div pops up with a text: "Грешно потребителско име или парола" at the top of the website viewport

Scenario: Login with university email

Given I open the FMI e-portal website: <https://e-portal.uni-plovdiv.bg/account/login/>

And I see the login form

When I click on the button "Вход с електронна поща"

And I choose my university email and give the necessary permissions

Then the university G-Suite is displayed (G-Suite is the Google package of services which the university uses)

And the dashboard menu is visible

Scenario: Download Windows 11 Education x64

Given I am logged in the FMI portal

When I click on "Софтуер" in the menu

And I click on "Изтегли" which is the first <a> tag under the <h2> "Windows 11 Education x64"

Then the ISO file starts downloading

Scenario: Upload a profile picture without selecting an image

Given I am logged in the FMI portal

When I click on my name in the upper right corner

And I click on "Настройки"

And I click on "Добави профилна снимка"

Then an alert message pops up saying: "Please Select Image"
